

CHAPTER 9. PERMITS AND REGISTRATION

Sections:

- 9.010 Permit Required.
- 9.015 Exemptions from permits.
- 9.020 Permit Application.
- 9.030 Permit Form and Agreement.
- 9.040 Inspection.
- 9.045 Permit Issuance.
- 9.050 Effective Period of Permit.
- 9.060 Contractor Registration.
- 9.070 District May Correct Defective Work.
- 9.080 Repair Work.
- 9.090 Suspension or Revocation of Permits.
- 9.100 Liability.

9.010 Permit Required. A person engaged in any of the following activities within the District shall obtain a permit issued by the District's Manager-Engineer:

- 1) Construction or repair of any public sanitary sewer including any private sanitary sewer intended to be dedicated to a public agency.
- 2) Construction of any private sewer intended to be connected to the District's sanitary sewer system, including, but not limited to:
 - (a) Connections from any new or replacement structure
 - (b) Connections from any existing structure intended to replace a septic or other on-site disposal system
 - (c) Connections intended to serve new or existing secondary units
- 3) Disconnection of any sewer from the District's sanitary sewer system.
- 4) Construction, installation, or substantial repair of any plumbing system which is connected to a sanitary sewer serving structures being remodeled, substantially improved or increased in size.
- 5) Replacement or installation of any sewer lateral, cleanout or backflow prevention system (as provided in Chapter 6 of the District's Ordinance Code).
- 6) The change of use in any commercial, industrial, or quasi-public structure which substantially impacts the quantity or quality of the effluent flowing from the structure to the District's sanitary sewer system as determined by the District's Manager-Engineer.
- 7) The subdivision or lot split of any parcel or parcels.

(Adopted by Ord. 10, Aug. 28, 1957; Amended by Ord. 17, Sept. 27, 1961; Amended by Ord. 24, June 8, 1965; Readopted, as modified, by Ord. 46, July 23, 1975; Amended by Ord. 60, July 27, 1977; Amended by Ord. 134, October 10, 2007; Amended by Ord. 136, May 13, 2009)

9.015 Exemptions from permits. Notwithstanding the above, the following activities are exempt from the permit requirements contained in Section 9.010:

- 1) Repairs or installations of plumbing fixtures (e.g. hose bibs) that are not connected to a sanitary sewer.
- 2) Minor repairs or upgrades to existing plumbing fixtures (e.g. new vanities, utility sinks, toilets).

- 3) Installation of pool or spas.
- 4) Minor repairs to existing sewers which are determined by the District Manager-Engineer to have no substantial impact on any public or private sanitary sewer system.

(Adopted by Ord. 136, May 13, 2009)

9.020 Permit Application. The applicant for a permit shall submit:

- (1) a description of the work proposed, including costs;
- (2) the location of the work;
- (3) the date the work will begin; and
- (4) the name of each person that will be responsible for the work.

(Adopted by Ord. 10, Aug. 28, 1957; Readopted, as modified, by Ord. 46, July 23, 1975)

9.030 Permit Form and Agreement. The District Manager and Engineer may prescribe the form of permit and require information in addition to that required by Section 9.020. The signature of the applicant on the permit application is an agreement to comply with the rules and regulations of the district.

(Adopted by Ord. 46, July 23, 1975)

9.040 Inspection. The work done under each permit shall be inspected by the district. No work shall be covered until it has been inspected and approved by the district. Work that has been covered without approval, at the district's request, shall be uncovered by the permittee for inspection. If the work does not meet the district's standards and requirements, the district may order disconnection of the work from its sewer system or other corrective measures at the expense of the permittee.

The permittee shall advise the district that work is ready for inspection on a normal working day by giving at least 24 hours notice in advance of the time inspection is requested.

Cross-reference: See Section 10.010 for inspection fees.

(Adopted by Ord. 10, Aug. 28, 1957; Amended by Ord. 24, June 8, 1965; Readopted, as modified, by Ord. 46, July 23, 1975; Amended by Ord. 60, July 27, 1977; Amended by Ord. 134, October 10, 2007)

9.045 Permit Issuance. The District Manager and Engineer shall issue all permits under this Chapter. However, the District Manager and Engineer shall not issue any permit which, in his opinion, will cause the district to exceed its ability to treat adequately the wastewater that would result from the issuance of such a permit. Any refusal to issue any permit under this Chapter is subject to the Appeals Procedure provided for in Chapter 11 of the district's Ordinance Code. (Adopted by Ord. 72, April 1, 1981)

9.050 Effective Period of Permit. A permit is effective for a period of one year from the date it was issued with respect to performance of the permitted work. The District Manager and Engineer may, for good cause shown, extend any permit beyond the initial one year period described above for no more than one additional year, provided that:

- (1) The specific activities permitted by the extension are substantially the same as the activities permitted by the original permit;
- (2) The applicant pay all applicable fees and charges existing as of the date that the extension is granted except that a credit shall be given for fees and charges paid under the original permit, to the extent they have not been previously expended by the district or any other government agency or they represent payment for work not yet done by the district or any other government agency in administering the permit process.

A permit is not transferable except those permits issued for a connection of a plumbing system to a building sewer.

(Adopted by Ord. 46, July 23, 1975; Amended by Ord. 54, May 26, 1976)

9.060 Contractor Registration. An applicant for a permit for the construction or repair of a public sewer and building sewer within streets shall be properly licensed for the work by the State and shall register with the district prior to being issued a permit for such work.

In order to become eligible for registration with the district a contractor shall:

- (1) File certificates evidencing maintenance of workers' compensation insurance, and public liability insurance in such amount as determined by the District Manager/Engineer after consultation with District Counsel.
- (2) Certificates of endorsements naming the district, City of Campbell, Town of Los Gatos, City of Monte Sereno, City of Saratoga, and County of Santa Clara and their

officers and employees as additional insured under the contractor's insurance policies; and,

- (3) A bond in such amount as determined by the District Counsel, in the form prescribed by the district, for the purpose of assuring compliance with the rules, regulations and specifications for the excavation within public streets and naming the district, City of Campbell, Town of Los Gatos, City of Monte Sereno, City of Saratoga, and County of Santa Clara as obligees.

(Adopted by Ord. 10, Aug. 28, 1957; Readopted, as amended, by Ord. 24, June 8, 1965; Readopted, as modified, by Ord. 46, July 23, 1975; Amended by Ord. 48, Dec. 11, 1975; Readopted by Ord. 51, May 13, 1976; Amended by Ord. 60, July 27, 1977; Amended by Ord. 91, Jan. 8, 1986; Amended by Ord. 95, Dec. 10, 1986)

9.070 District May Correct Defective Work. If a permittee fails to correct defective work within 10 days after the district gives notice to do so, the district may proceed to correct the defective work and the permittee shall compensate the district for the cost thereof, including all direct labor and material costs and overhead. If in opinion of the District Manager and Engineer the defective work creates an emergency which should be corrected immediately, the District Manager and Engineer may order the permittee to correct the defect within a specified period of time. If the permittee fails to respond within the time specified, the district may proceed to correct the defective work and the permittee shall compensate the district for the cost thereof, including all direct labor and material costs and overhead.

(Adopted by Ord. 46, July 23, 1975)

9.080 Repair Work. If a person damages a public sewer or a building sewer within the district, and does not apply to the district for a permit to make repairs to the said sewers within ten days after the district gives notice to do so, the district may proceed to make the said repairs and the person damaging said sewers shall compensate the district for the cost thereof, including all direct labor and materials and overhead. If in the opinion of the District Manager and Engineer the damage to the said sewers creates an emergency which should be corrected immediately, the District Manager and Engineer may order said person to make the repair within a specified period of time. If said person fails to respond within the time specified, the district may proceed to make the repairs and said person shall compensate the district for the cost thereof, including all direct labor and material costs and overhead.

(Adopted by Ord. 46, July 23, 1975; Amended by Ord. 60, July 27, 1977; Amended by Ord. 134, October 10, 2007)

9.090 Suspension or Revocation of Permits. If the permit holder fails or refuses to comply with any provision or condition of the permit, this code, the rules, regulations and orders of the District Manager and Engineer, or the rules and regulations of a municipal, county, state or federal agency, the District Manager and Engineer shall have the authority to suspend the permit by giving written notice of the suspension to the permit holder, stating that the permit is suspended, the reasons for the suspension, and the effective date of suspension. The suspension continues until the permit holder removes the grounds for suspension, but in no event shall the suspension be in effect for longer than 6 months from its effective date. All orders of suspension are subject to the Appeals Procedures provided for in Chapter 11 of the district's Ordinance Code.

If any of the grounds for a suspension continue during the period of the suspension, and, in the opinion of the District Manager and Engineer, are likely to continue past the termination date of the suspension; he may give written notice to the permit holder specifying the time and place of a hearing before the district Board of Directors to consider the revocation of the permit. Said notice shall be given at least ten days (10) prior to said hearing, served in the manner prescribed in Sections 1.120 thru 1.140 of the district's Ordinance Code and shall include the grounds for the proposed revocation.

Upon a finding that any of the grounds specified in the notice are true, the Board of Directors may revoke the permit.

(Adopted by Ord. 46, July 23, 1975; Amended by Ord. 72, April 8, 1981)

9.100 Liability. The district, its officers and employees shall not be liable for personal injury or loss of life or damage to any property consequent to the performance of any work pursuant to a permit issued by the district. The permittee shall save the district, its officers and employees free and harmless from any such liability imposed by law upon the district, its officers and employees, including all costs, expenses, fees and interest incurred in legal defense of any action to enforce such liability, or the enforcement of this section. The permittee shall be solely liable for any defects in the performance of his work or any failure which may develop therein.

(Adopted by Ord. 46, July 23, 1975)
